Technology

ABOUT US

ESTABLISHED IN 2003, XIAMEN OLLITAL TECHNOLOGY CO., LTD. IS A PROFESSIONAL ENTERPRISE ENGAGED IN RESEARCH, DEVELOPMENT, PRODUCTION AND SALES OF LABORATORY INSTRUMENTS AND EQUIPMENT. THE COMPANY COVERS AN AREA OF ABOUT 5,000 SQUARE METERS AND HAS MORE THAN 30 R&D TECHNICIANS. IT IS COMMITTED TO PROVIDING USERS WITH ADVANCED AND RELIABLE LABORATORY INSTRUMENTS TO MEET THE NEEDS OF USERS. A RELATIVELY COMPLETE MANAGEMENT SYSTEM AND A GLOBAL SALES AND SERVICE NETWORK.

Spray Dryer Description

2L Laboratory Spray Dryer

The 2L Laboratory Spray Dryer is a compact and efficient drying solution designed for research, product development, and small-scale powder production. Utilizing advanced two-fluid atomization technology, it rapidly converts liquid samples into fine, uniform powders, making it ideal for universities, research institutes, and industrial laboratories.

Key Features:

- Evaporation Capacity up to 2L/h
- Transparent borosilicate glass chamber
- Precise temperature control
- Low sample consumption for R&D applications
- High powder recovery efficiency
- Optional organic solvent recovery system

Applications:

Advanced Materials, Battery Materials, Nanomaterials, Pharmaceuticals, Biotechnology, Food Ingredients, Fine Chemicals, and Functional Powders.

Transform Liquid into Powder in Seconds.

Reliable, efficient, and designed to accelerate innovation in laboratory-scale spray drying.

Parameter

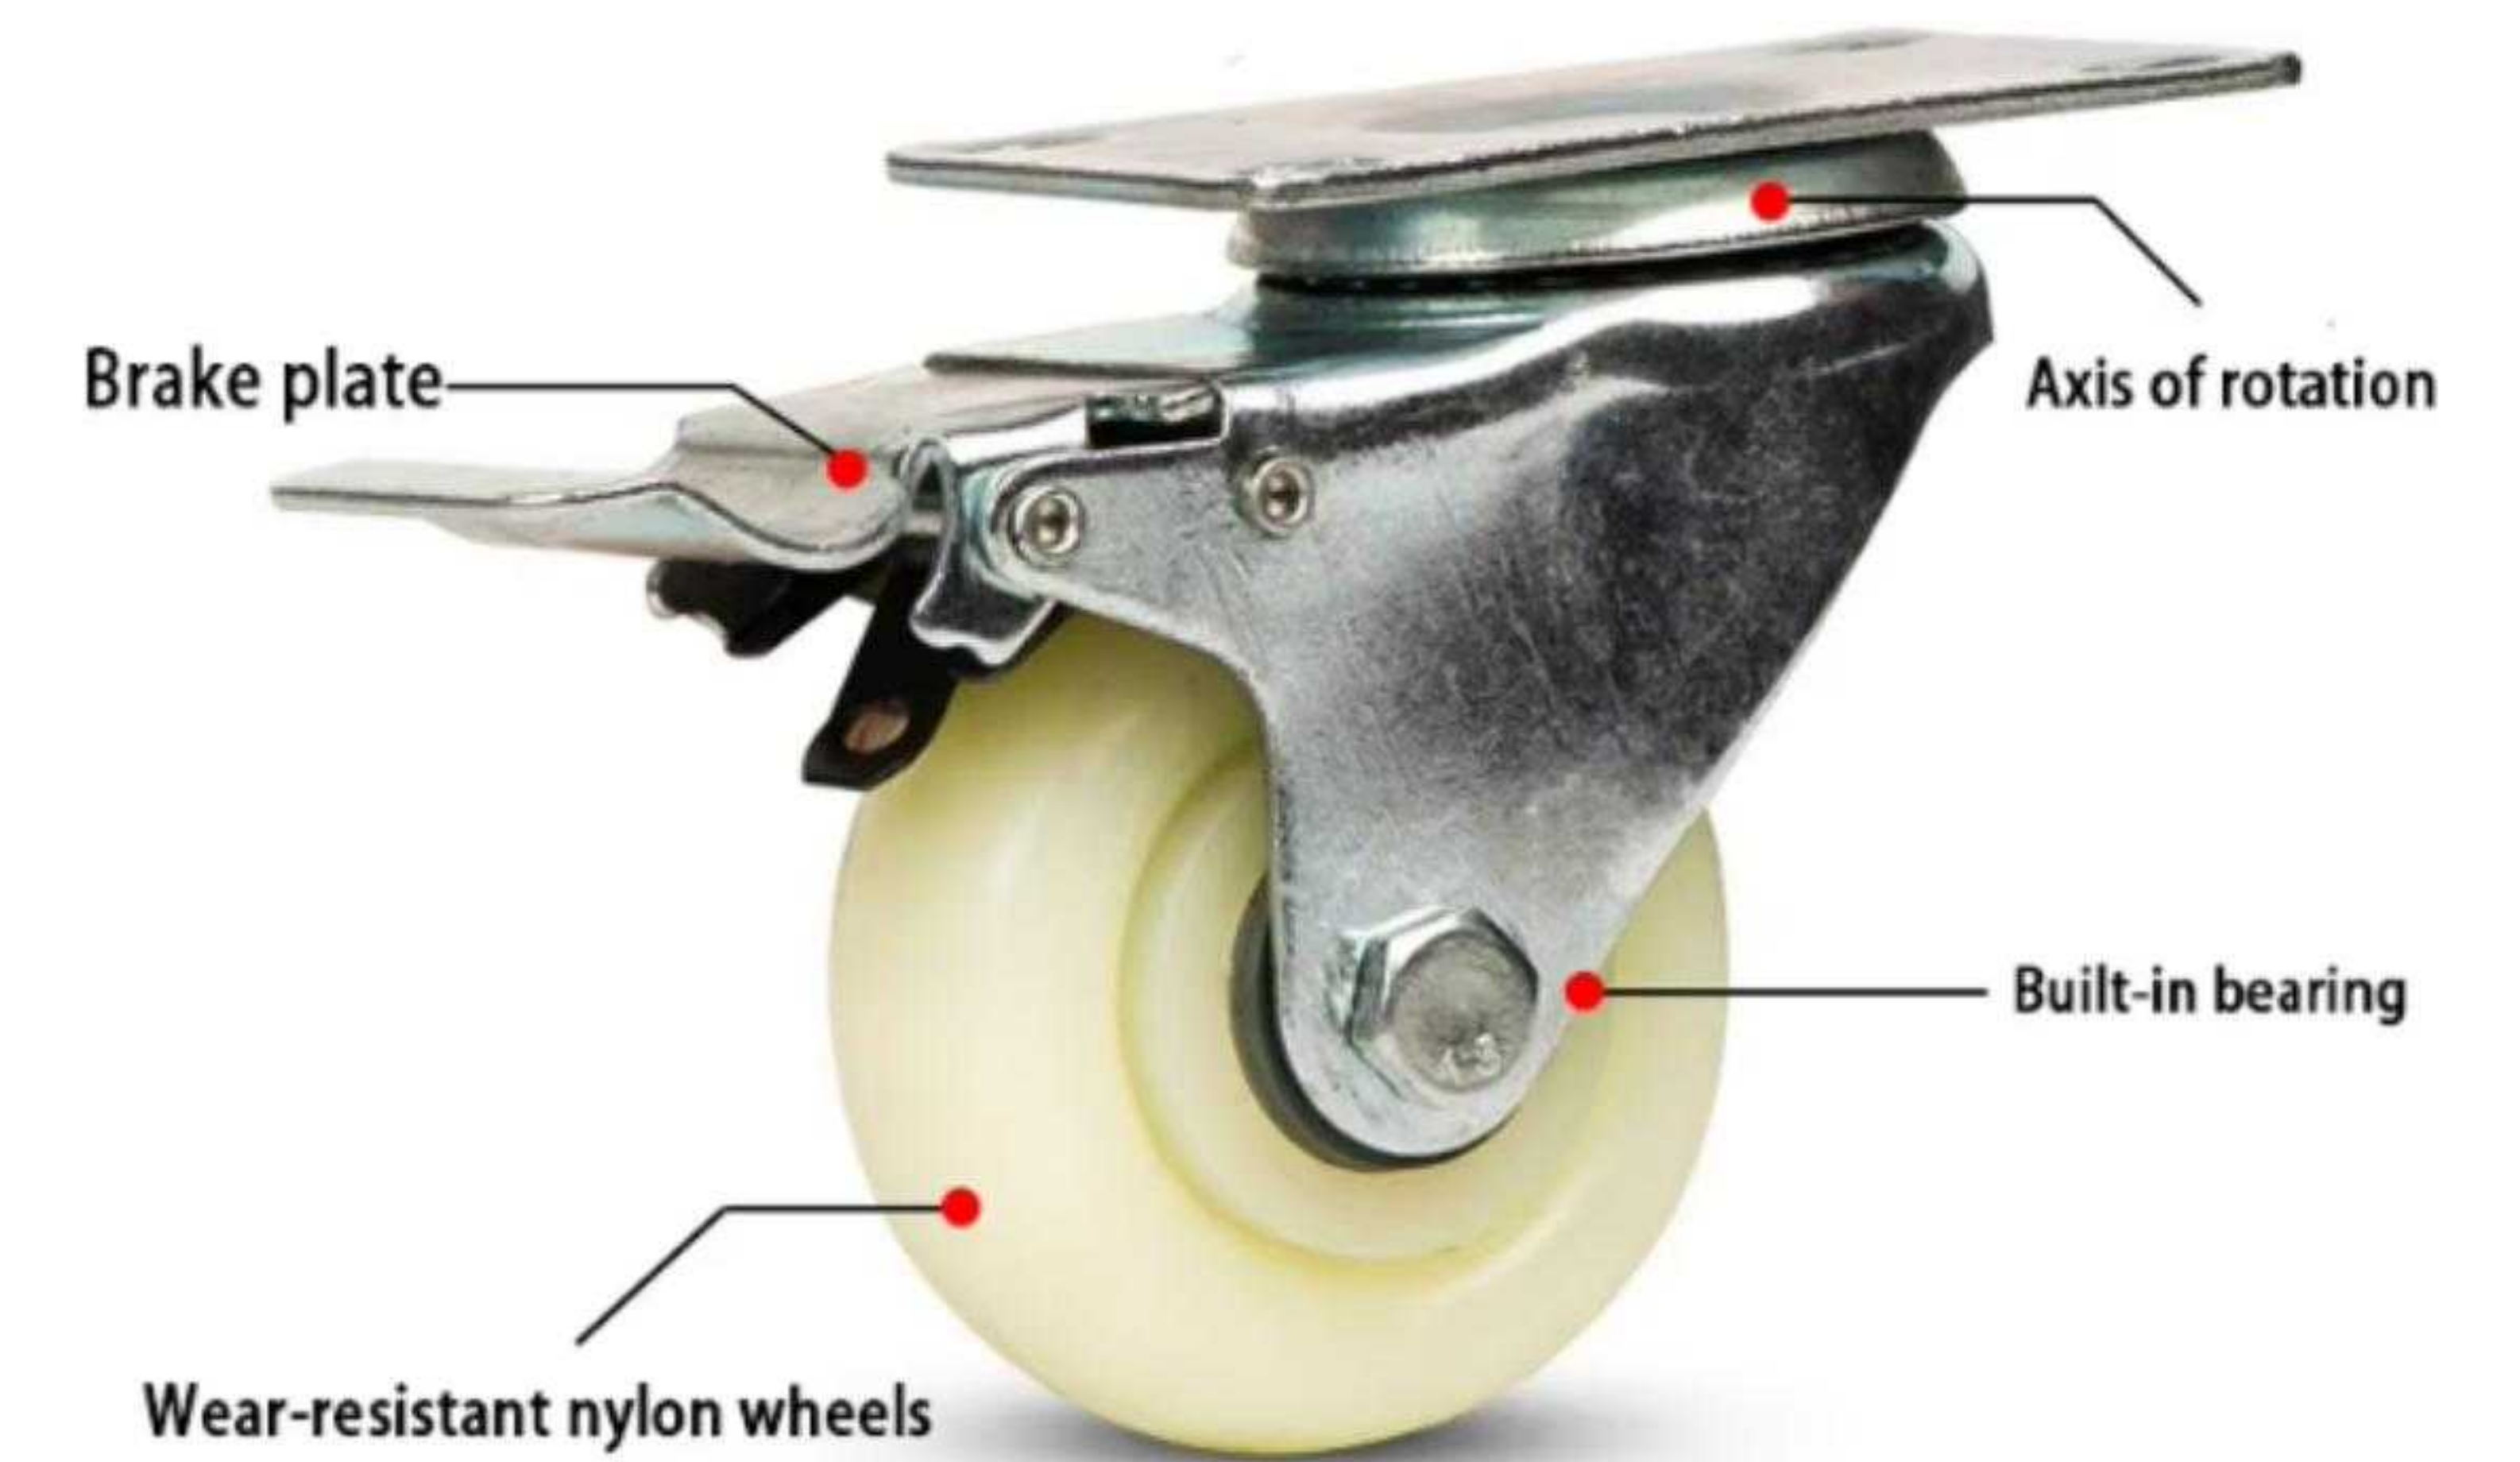

Picture	 2790USD	 3600USD
Material	Glass	Stainless steel
Model	OLT-SD8000B	OLT-SD8000S
Capacity	1500-2000ml/h	
Temperature range of inlet air	30°C -280°C	
Temperature range of outlet air	40°C -120°C	
Precision of temperature	± 1 °C	
Dryer time	1.0-1.5 S	
Consume of dryer air	30-2000ml/h	
Speed of squirmy pump	0-330m³/h, max pressure: 686Pa	
Consume of spray air	0-4.2m³/h, spray pressure: 2-5bar	
Spray system	2 liquid nozzles with standard 1.0mm jet Options of 0.5/0.7/1.5/2.0/2.5mm	
Power	3.5KW 108V-240V	
Machine size	650*800*1300 (mm) L * W* H	

Structure and dimensions

Nylon Vientiane Wheel

Bearing weight Super wear-resistant
360 degree rotation

NO.1 DETAILS

Drying tower

The drying tower is made of high borosilicate glass material, which has good transparency and corrosion resistance.

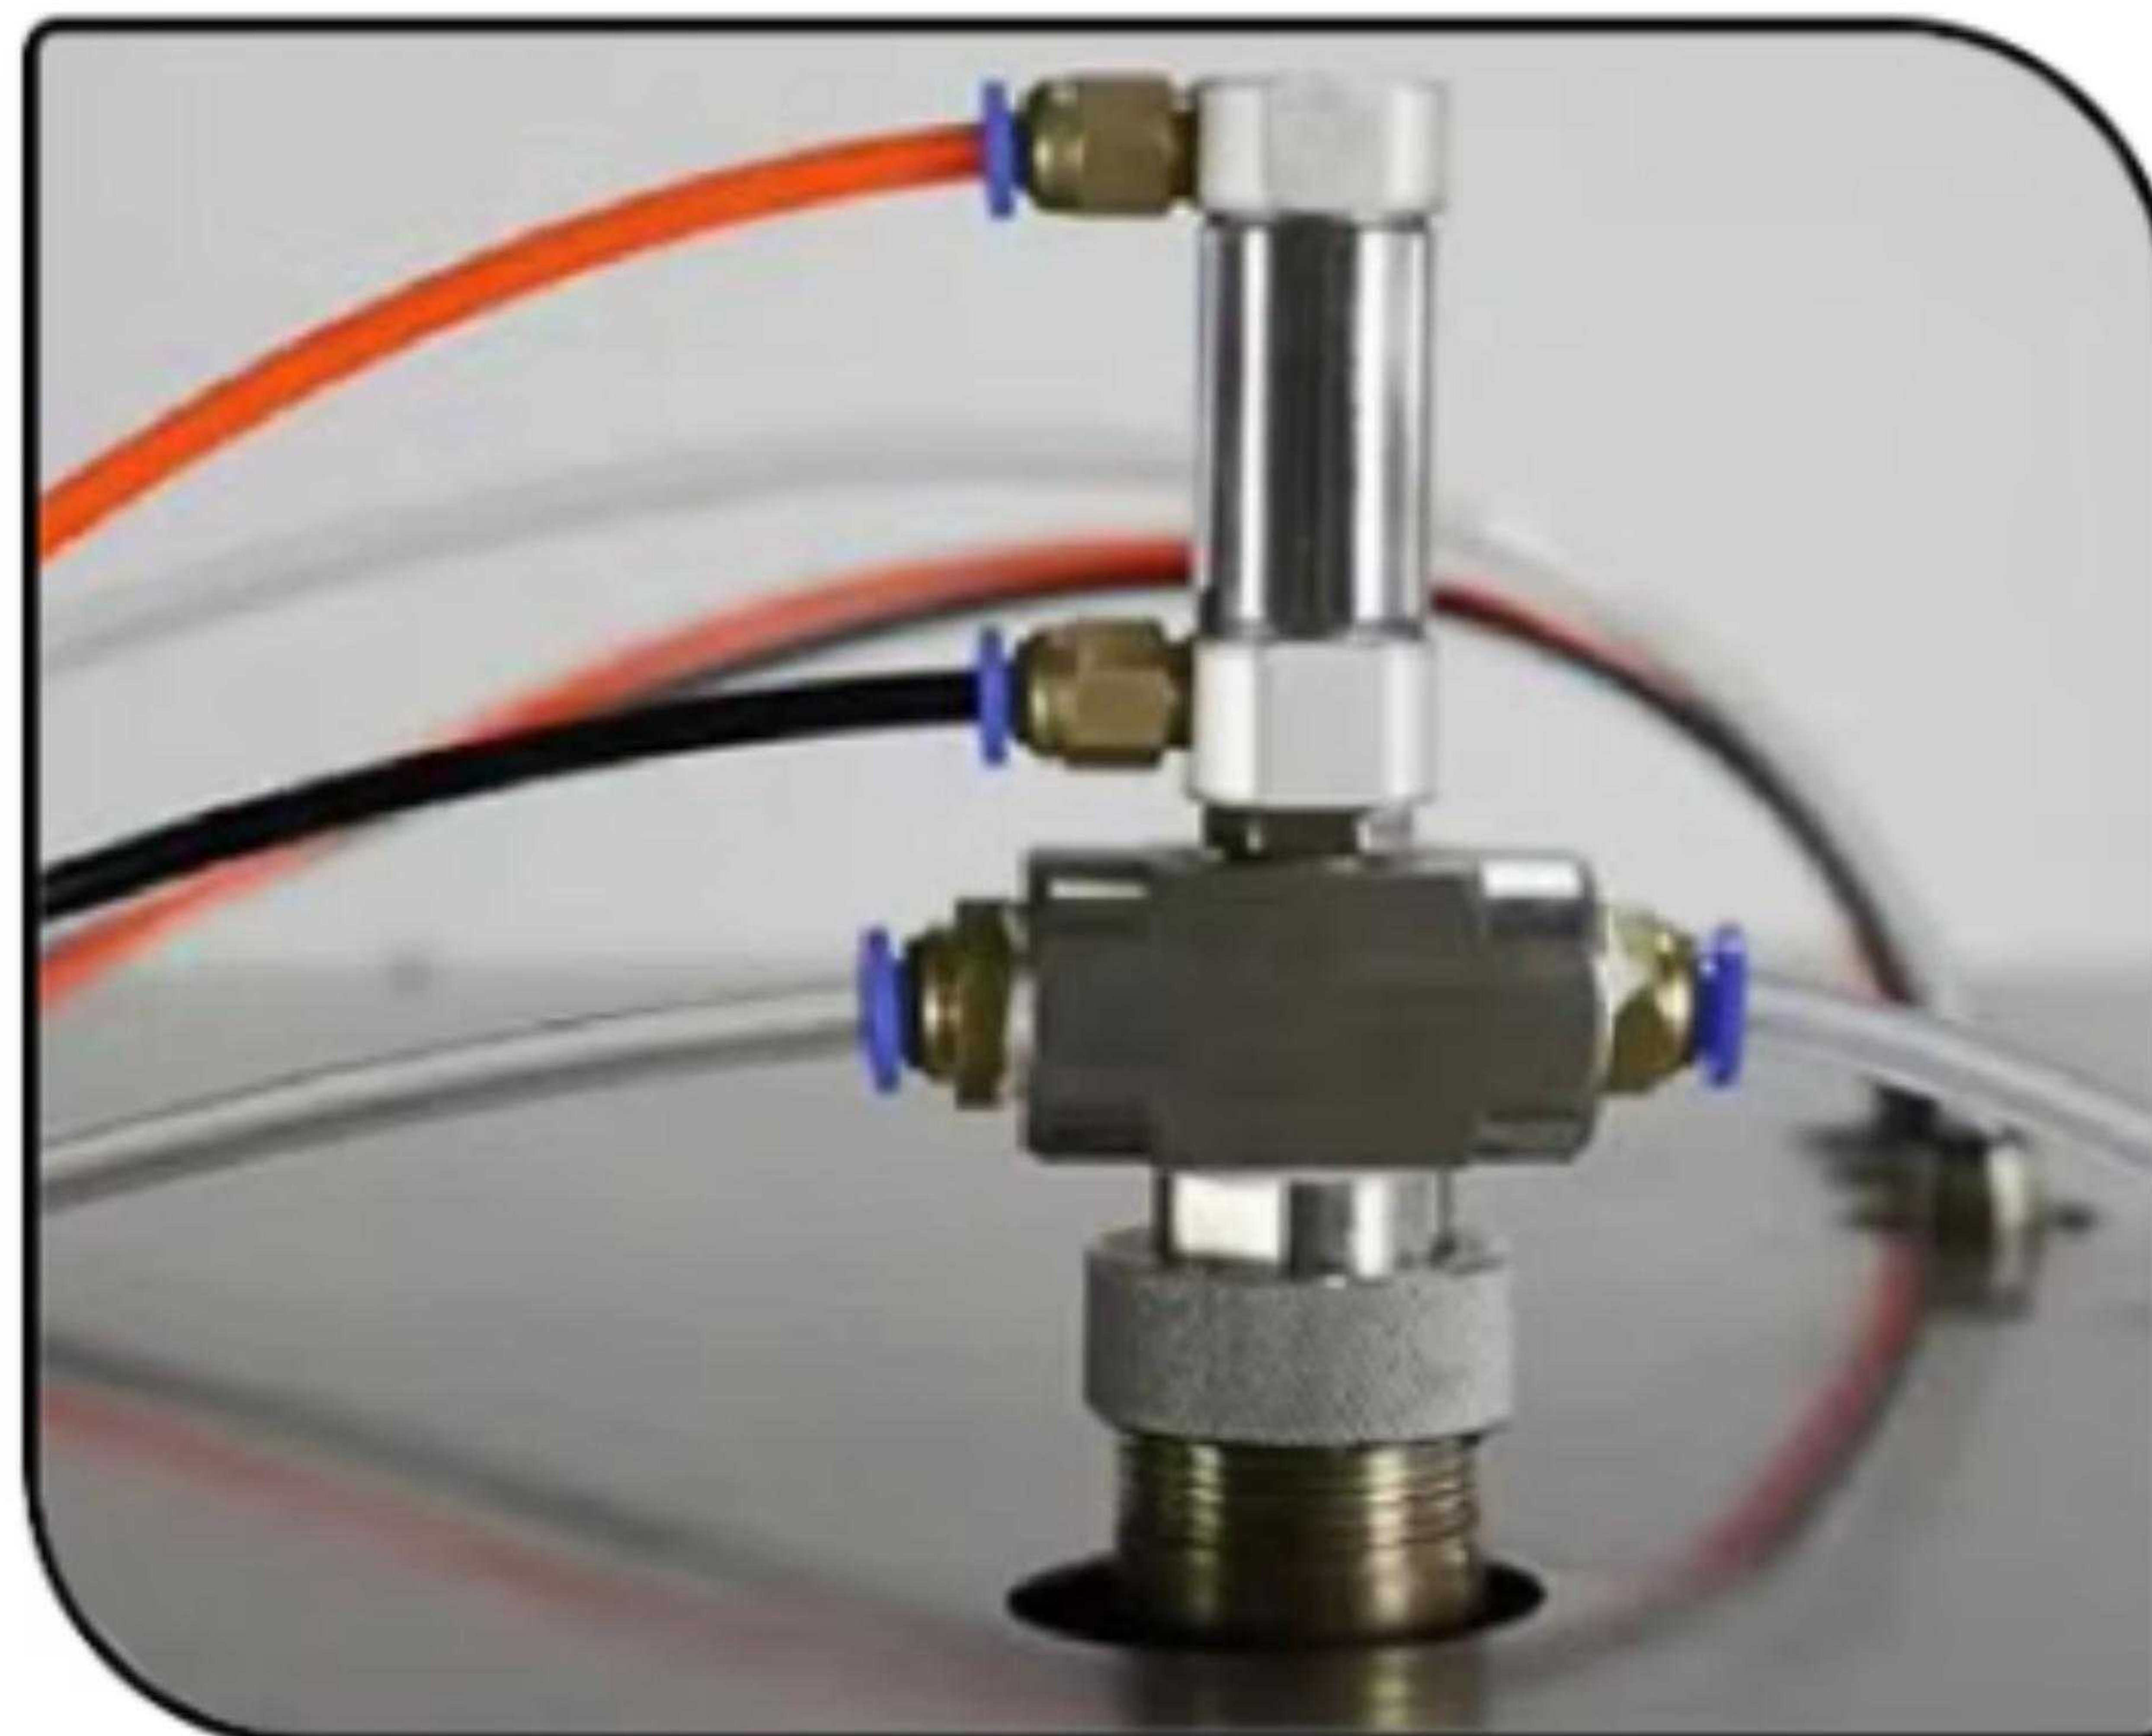

DETAILS **NO.2**

Atomizer nozzle

Nozzle material: SUS316

Main material: SUS304

Continue to use concentric coaxial airflow atomization system.

NO.3 DETAILS

LCD screen

Support Chinese and English switching operation temperature change adjustment, control of multipump/single pump working modes, and other functions.

DETAILS NO.4

Peristaltic pump

The feeding amount can be adjusted through a peristaltic pump.

Accessories

Different models of spray guns

Air compressor

- Special protection function, the fan will not start and the heater will not start.
- Built-in imported oil-free air compressor with noise less than 50db.
- Equipped with air inlet filter to ensure sample purity.
- Dried product has uniform particle size, more than 95% of the dry powder is at the same particle size.

Spray Dryer

Spray Dryer

Continuous flow low temperature spray dryer (Suitable for flammable and explosive organic solvents such as ethanol.)

Name	Organic solvent spray dryer
Model	OLT-SD15ES
Voltage	380V,50-60Hz (Low temperature cooling circulation pump380V)
Outlet air temperature	40-150°C
Drying capacity	50-1500ml/h
Explosion-proof fan	0-330 m/h Adjustable wind speed
Inlet air temperature	30-250°C
Temperature control accuracy	±1C
Nozzle	Standard1.0mm (0.5/0.75/1.5/2.0mm Optional and can be customized)
Type of spray head	Two-fluid concentric spray head with automatic needle feeding to prevent clogging
Particle size after drying	1-25microns
Drying time	1.0-1.5 h
Operating mode	automatic / manual
Rated material throughput	1500ml/hr
Small material handling capacity	50ml
Seal ring material	PTFE/Silicone
Dry air	N2 (for organic solvent) or compressed air (for aqueous solution))
Size	800*950*1350mm
Seven-inch color touch screen	Seven-inch touch screen operation, Chinese and English interface, with USB connection
Thermal protection	Special protection function The heater cannot be started if the fan does not start, and the air volume of the fan can be adjusted.
Nitrogen circulation system	YES

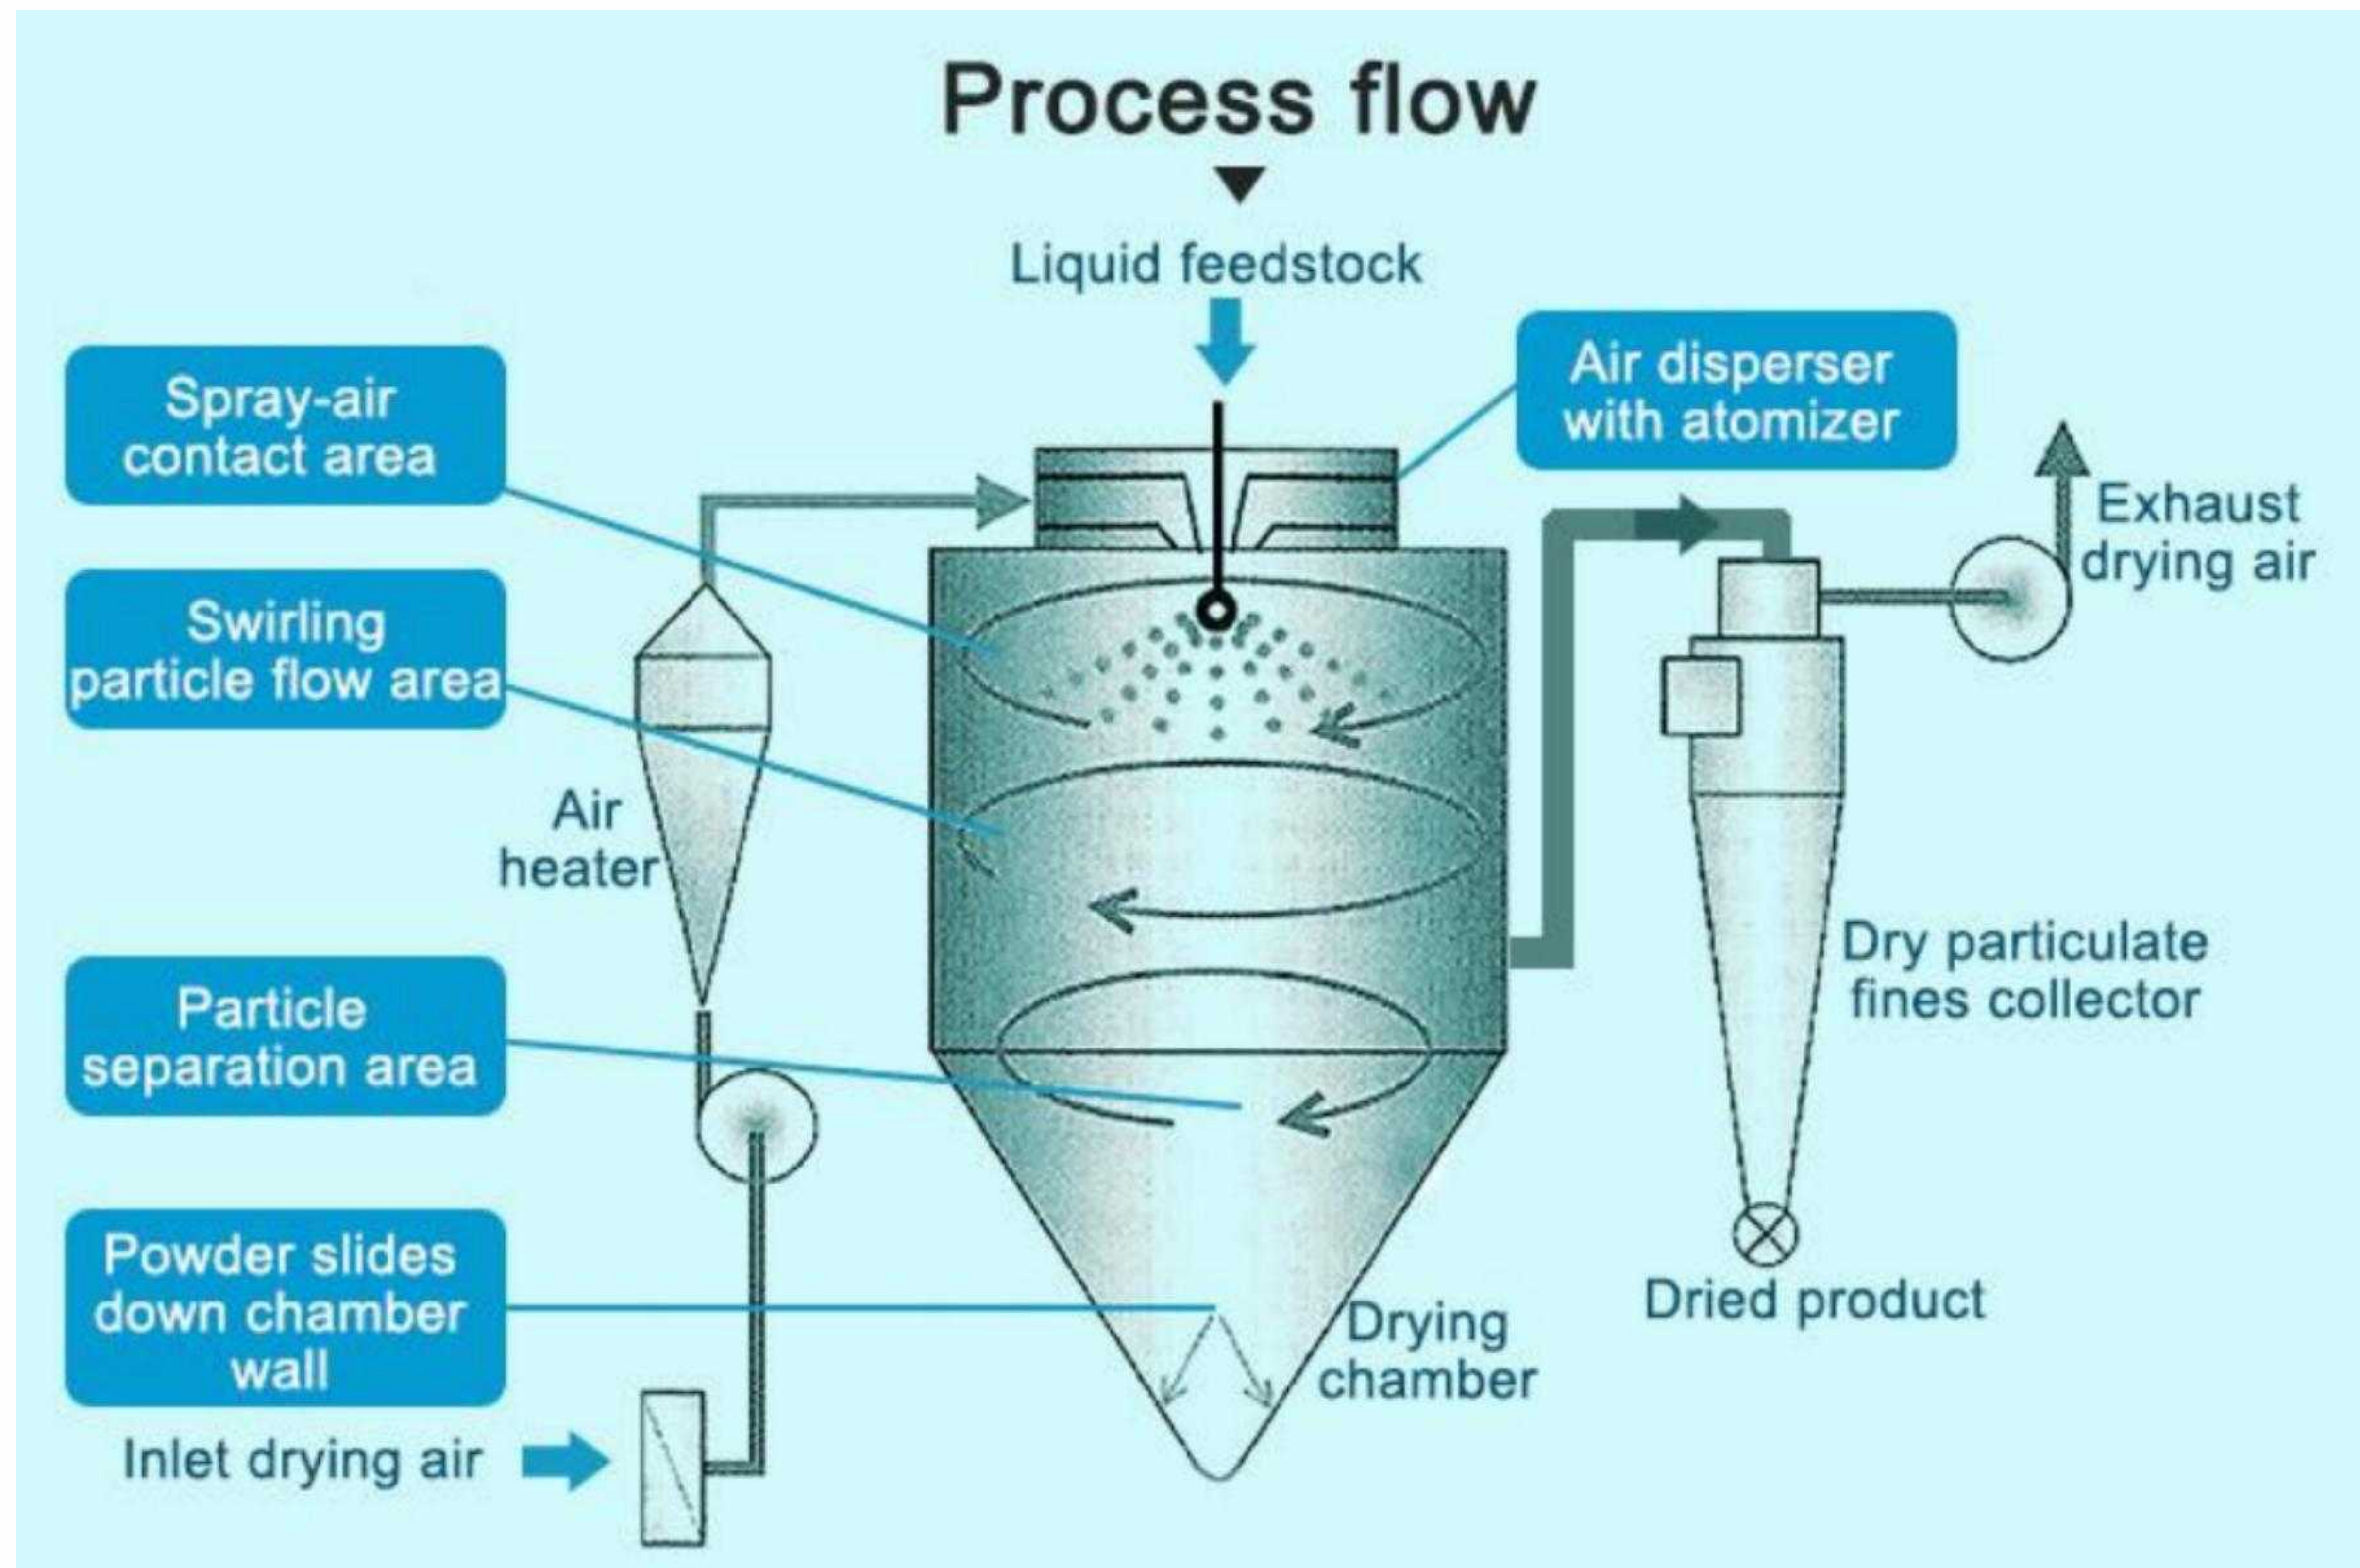

Spray Dryer

Centrifugal spray dryers are used in the food industry, the pharmaceutical industry, the production of ultra-fine nano powders and the bioremediation of soil oil pollution. The air passes through the filter and heater and enters the air distributor on the top of the centrifugal spray dryer. The hot air enters the dryer evenly in a spiral shape.
